OBJECTIONS TO LOCAL DEVELOPMENT PLANS

To Whom it may Concern

We wish to have our objections counted about the proposed developments for 12,000 new houses to be built in this area by 2020.

Our beautiful Warwickshire countryside will become a concrete jungle. The small town of Warwick will become more polluted and the wonderful history will decay with the pounding of vehicles on the highways. Our heritage will be ruined with nothing to pass onto our children and future generations.

The idea of making the roads wider is mad when you only have ancient bridges crossing the rivers into the town bringing any road structure back down to one way traffic. The ancient bridges are under pressure now any increased weight will be catastrophic. The air pollution is also above recommended levels, this will increase making Warwick a very undesirable area to live in. It will and does affect our historic buildings causing them to crumble and decay. As for the people of Warwick they will be at greater risk of heart and respiratory problems as reported by the British Heart Foundation. This in turn will add a greater burden to our already busy hospitals and care services. The town is easily grid locked now when any incidents on the highways/motorways occur causing the air to reek of foul exhaust fumes and very frustrated drivers stuck, walking in the town becomes very unpleasant.

These are a very few points but much has been written by many local people for you to realise we do not want this to happen. We have so much history in Warwick and around the area that it should be preserved not destroyed.
