10

### Which I consider should be taken into consideration

#### Employment

Businesses located at GT 02 in addition to the Warwickshire Exhibition Centre. They produce, specialist storage, event management and publishing. Collectively they employ 50 and 60 people and the site would cause significant difficulties for all. If not chosen, then due to the PERCEPTION of event organisers it is estimated that within 12 months the Exhibition Centre would lose sufficient events to make it impossible to continue. The company itself would cease to exist resulting in upwards of ten permanent job losses and event staff losses.

#### The wider economic situation

The Exhibition Centre will contribute in the region of £5 million to the local economy through accommodation, restaurants, entertainment, bus and taxi usage over the coming four years. It attracts visitors from a wide area and it is often the case that husbands/wives/partners will use the bus service to go shopping in Leamington Spa whilst spouses enjoy the exhibitions. The site would be lost if the Exhibition Centre were to close.

#### Heritage

The site is right next to the historic Fosse Way. The road now known as the Fosse Way was built by the Romans in AD 43, nearly 2000 years ago, and has been a major highway for over 2000 years. There was a tollhouse on the junction of the Fosse Way and Southam Road in the 17th and 18th centuries. If GT 02 is approved it is important that a major archaeological dig should be carried out to site work so that the archaeology and heritage of the area can be recovered and preserved.

The site has considerable infrastructure in addition to the actual site. Its proximity to the A46 requires traffic control and road widening to provide a right turning lane for access. The site could include bus shelters and a pedestrian crossing and more street lighting would be required.

The proposed GT02 site is part of an area of some 50 acres of good quality, extensively used agricultural land. An unauthorised intrusion from GT 02 into the agricultural land could result in contractors using heavy machinery and equipment and this together with crop damage and possible rubbish dumped in the land ceasing to be farmed and becoming unsightly.

#### Openness

The surrounding GT 02 is rural and agricultural in aspect and the proposed site will be a major intrusion into the openness of the countryside and will be an irreversible urbanisation of the entire area. If approved, the council will be ill placed to prevent further 'ribbon' development.

#### Wildlife

The GT 02 are Fosse Alpaca and Kune Kune Pigs, a business breeding these rare breed animals. The alpaca herd numbers 30 animals and the owners are extremely conscious of bio security to protect the animals from diseases such as foot and mouth, TB and Parvo virus. These are spread by human trespass and unvaccinated dogs. The animals graze on fields between the site and the Grand Union Canal.

#### Habitat

The site is adjacent to two historic traditional Woodlands, which provide a habitat for birds and small mammals. The site would be greatly affected by the proposed site and the possible intrusion and activities of the site. It is known to be a habitat for Pipistrelle bats (*Pipistrellus pipistrellus*) and also great crested newts (*Amphibian cristatus*), amongst other species.

## Part B - Commenting on the Gypsy and Traveller Site Options

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet 4 of 10

The policy in the Draft Local Plan will list the criteria by which Gypsy and Traveller sites will be assessed for sustainability. These are the criteria:

- Convenient access to a GP surgery, school and public transport;
- Avoiding areas with a high risk of flooding;
- Safe access to the road network and provision for parking, turning and servicing;
- Avoiding areas where there is the potential for noise and other disturbance;
- Provision of utilities (running water, toilet facilities, waste disposal, etc);
- Avoiding areas where there could be adverse impact on important features of the local environment; and,
- Sites which can be integrated into the landscape without harming the character of the area;
- Promotes peaceful and integrated co-existence between the site and the local community;
- Avoids placing undue pressure on local infrastructure and services;
- Reflects the extent to which traditional lifestyles (whereby some travellers live and work from their location thereby omitting many travel to work journeys) can contribute to sustainability.

Please give your views about site suitability below with reference to this list of criteria.

Which site are you responding to?

### Site GT03 – Land at Barnwell Farm

What is the nature of your representation?

### Object

Please set out full details of your objection or representation of support with reference to the criteria.

#### • Convenient access to a GP surgery, school and public transport;

This site is in excess of 1.5 miles from any GP surgery. The proposed site is outside of the Harbury Surgery and the nearest surgery is the Warwick Gates Family Health Centre which is 3 miles away which I understand is full so there is no convenient access to a surgery.

The position with regard to schooling is similar with GT03 being outside of the Harbury Primary School. Harbury Primary School has had recent issues with too many children already. There are also 20 children on the Whitnash (over 2 miles away) with limited capacity.

The public transport whilst satisfactory is largely irrelevant as the residents are unlikely to use their own transport. There is a bus stop on the Harbury Lane however there is no pedestrian crossing at the potential site.

### Other issues which I consider should be taken into consideration

#### Local Business/Employment

There are many businesses that operate from GT03 site and the surrounding area and will suffer if the proposed sites go ahead. For example:

1. Will Russell – Farm land being fully utilised for sheep
2. Bob Wright – land being used for arable farming
3. Fosse Garage
4. Rollason Fencing
5. Barnwell Chicken Farm
6. MH Polo Ltd – teaching people to ride ponies
7. Fosse Paddocks Ltd – farming and ponies
8. Warwick Reclamation
9. Mallory Court Hotel
10. Harbury Lane Breakers Yard
11. There are many others.

#### Archaeology and Heritage

GT 03 is located right next to the historic Fosse Way. The road now known as the Fosse Way following the Roman invasion in AD 43, nearly 2000 years ago, and has been a major highway throughout the centuries. There was a tollhouse on the junction of the Fosse Way and South the 17th and 18th centuries. If GT 03 is approved it is important that a major archaeological take place prior to site work so that the archaeology and heritage of the area can be recovered and safeguarded.

#### Urbanisation

GT 03 will involve considerable infrastructure in addition to the actual site. Its proximity to a roundabout may require traffic control and road widening to provide a right turning lane for

Further features could include bus shelters and a pedestrian crossing and more street lighting needed.

#### Agriculture

10

The Local Plan will list the criteria by which Gypsy and Traveller sites will be judged for suitability and the criteria:

Access to a GP surgery, school and public transport;

Areas with a high risk of flooding;

Access to the road network and provision for parking, turning and servicing on site;

Areas where there is the potential for noise and other disturbance;

Provision of utilities (running water, toilet facilities, waste disposal, etc);

Areas where there could be adverse impact on important features of the natural and historic environment; and,

How the site can be integrated into the landscape without harming the character of the area.

How to ensure peaceful and integrated co-existence between the site and the local community;

How to avoid placing undue pressure on local infrastructure and services;

The extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.

How to describe your site suitability below with reference to this list of criteria.

Responding to?

**Site at Harbury Lane, Fosse Way**

Your representation?

**Object**

Provide details of your objection or representation of support with reference to the criteria above.

**Access to a GP surgery, school and public transport;**

The proposed site is outside of the catchment area of any GP surgery. The nearest surgery is the Warwick Gates Family Health Centre which is approximately 1.5 miles away. The catchment area for this surgery, which I understand is full so there is no convenient access to a surgery.

With regard to schooling is similar with GT03 being outside of the Harbury catchment area and Harbury School has had recent issues with too many children already. There are several schools in the area (2 miles away) with limited capacity.

Public transport whilst satisfactory is largely irrelevant as the residents are unlikely to use anything other than their own cars. There is a bus stop on the Harbury Lane however there is no pedestrian links from that to the site.

Rep. Ref.

# Part B - Commenting on the Gypsy and Traveller Site

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

Sheet 8 of 10

**Avoiding areas with a high risk of flooding**

The area is prone to flooding. Fields are often under water and livestock and ponies may be affected. The area is effectively a flood plain.

The Middle Road/ Fosse Way junction is often flooded. Harbury Lane is often flooded and impassable.

**Safe access to the road network and provision for parking, turning and servicing on site;**

The proposed 15 pitch site will contain up to 50 vehicles and generate hundreds of traffic movements. The junction of two major roads and access into the traffic flow will possibly need highway works. It is possibly unwise to introduce even more traffic turns at this major junction and it will certainly cause existing peak time delays. GT04 is sited on the junction of two main roads with high traffic volumes. Fosse Way in particular sees fast traffic despite the nearby speed camera and is a designated Highways Act road. There have been more than 12 Serious Accidents at this junction over the last 10 years. Harbury County Council. There have been more than 12 Serious Accidents at this junction over the last 10 years.

**Avoiding areas where there is the potential for noise and disturbance**

This site is adjacent the Fosse Way a very busy and noisy main road. In addition this is adjacent the Birmingham to London Chiltern railway line, causing both noise and vibration danger.

**Provision of utilities (running water, toilet facilities waste disposal etc);**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

GT04 is considered by British Telecom to be too far from the Whitnash Telephone Exchange to provide adequate telephone or internet service (They term it as a long line). They will not upgrade the site. Poor telephone connections and intermittent (<1mbs) internet service.

GT04 does not have a reliable mobile phone service. There are no mobile phone networks in the area other than a mediocre service.

**Avoiding areas where there could be an adverse impact on important, features of the local environment;**

This choice of site overlooks the fact that at this point the Fosse Way, as the original Roman road, has been known for years ago is known, is on its original alignment and there is likely to be considerable archaeological interest in the area which will be destroyed by the development. There was also a tollhouse nearby in the area and remains have been found. The site would be a blight on the vistas from the Grade 1 Listed Windmill which is maintained by Warwickshire County Council. The views from this farm would be of material consideration should a planning application ever be made.

**Sites which can be integrated into the landscape without harming the character of the area;**

The proposed site will cover 0.8 hectare (8000 m<sup>2</sup>) which is larger than the New Windmill site. The Enfusion (consultants) recommendation to include working space is adopted this would be twice the area of the football ground. There will be a large variety of caravans and vehicles parked on the bottom of the valley, it cannot be integrated into the landscape without harming the visual character of the area. The site is also very visible from Chesterton Hill and would undoubtedly be a blight on the wider surrounding area.

**Promotes peaceful and integrated co-existence between the site and the local community;**

In this respect the local community forms two distinct sections. There is a very small community of houses within half a mile of the site along the Fosse Way and the far greater community of Harbury and Whitnash over 1.5 miles away.

It will be difficult to integrate the residents into the local Fosse Way community as well as the wider community on site rather than integrate they will actually absorb the local community. This does not promote peaceful and integrated co-existence.

**Avoids placing undue pressure on local infrastructure and services;**

The proposed site has no mains sewerage, drainage or gas so fails to meet the criteria. Also the electricity supply is a limited rural line and will possibly need to be upgraded to meet the very considerable increase in demand.

**Reflects the extent to which traditional lifestyles (whereby some travellers live and work from the same location thereby omitting many travel to work journeys) can contribute to sustainability.**

If you are commenting on multiple sites you will need to complete a separate sheet for each representation

0

Sheet 10 of 10

**What I consider should be taken into consideration**

**Employment**  
 Businesses that operate from GT04 site and the surrounding area and will potentially be affected if development sites go ahead. For example:  
 - Russell – Farm land being fully utilised for sheep  
 - [Name] – land being used for arable farming  
 - [Name] Garage  
 - [Name] Fencing  
 - [Name] Chicken Farm  
 - [Name] Ltd – teaching people to ride ponies  
 - [Name] Paddocks Ltd – farming and ponies  
 - [Name] Reclamation  
 - [Name] Court Hotel  
 - [Name] Lane Breakers Yard  
 - [Name] are many others.

**Heritage**  
 Site is situated next to the historic Fosse Way. The road now known as the Fosse Way was built by the Romans in AD 43, nearly 2000 years ago, and has been a major highway for centuries. There was a tollhouse on the junction of the Fosse Way and Southam Road in the 17th century. If GT 04 is approved it is important that a major archaeological dig should be carried out so that the archaeology and heritage of the area can be recovered and preserved.

There is a considerable amount of infrastructure in addition to the actual site. Its proximity to the site will require traffic control and road widening to provide a right turning lane for access. The site should include bus shelters and a pedestrian crossing and more street lighting would be required.

The proposed GT04 site is part of an area of good quality, extensively farmed land. Conversion of agricultural land into residential or commercial use could result in contractors not wishing to use the site for equipment and this together with crop damage and possible rubbish deposits could result in the site ceasing to be farmed and becoming unsightly.

Allowing GT 04 is rural and agricultural in aspect and the proposed site will be a major loss of the openness of the countryside and will be an irreversible urbanisation of the entire area. The council will be ill placed to prevent further 'ribbon' development.

Do you have any other suggestions for land within this district that you think would be suitable for a Traveller site, bearing in mind the criteria for site identification? If so, please give the location details below:
