Part B - Commenting on the Stratford Road Gypsy and Traveller Preferred Site

The policy in the Draft Local Plan will list the criteria by which Gypsy and Traveller sites will be judged for suitability and sustainability. These are the criteria:

- a) the site is within reasonable distance of schools, GP surgeries, dentists, hospitals, shops and community facilities;
- b) the site has good access to the major road network;
- c) the site is of a suitable size to accommodate between 5 and 15 pitches for permanent sites or 12 pitches for transit sites;
- d) it can be demonstrated that infrastructure requirements can be adequately met;
and
- e) there is potential for the site to be adequately screened.

What is the nature of your representation? Support Object Comment

Please set out full details of your objection or representation of support with reference to the criteria above.

Whilst I do not reside in the immediate area, I have very strong links with Longbridge and know the proposed site and its locale extremely well.

Before commenting I would like to know why the criteria for comments has been restricted to just the five points above, when the Government's own guidelines state that many more areas are to be considered?

"b) the site has good access to the major road network"

By no stretch of the imagination can the private, narrow, pot-hole riddled farm track belonging to Longbridge Farm and forming the existing access to the proposed site be described as "good access". I am only able to assume that this is the proposed route to the site as WDC has failed to provide the additional information elaborating on access that it said it would when publishing its consultation document? I am also assuming that this is the (totally unsuitable) access route as I have seen correspondence from Severn Trent Water stating that they are opposed to the siting of the Traveller site, which leads me to conclude that they would not be happy having an access route through their land which lies adjacent. The point at which traffic from the site would enter/exit the A429 is extremely dangerous. It is situated on a stretch of road with obvious visibility issues and necessitates turning across the path of oncoming traffic on a semi-blind bend if it is to be accessed from the M40 direction.

" e) there is potential for the site to be adequately screened"

The fact that the proposed site lies next to an active sewage works and M40 motorway, has led to claims by WDC that these factors can be mitigated by screening. The fact that the site will be home to children and is situated next to the fast flowing and potentially dangerous River Avon means that this side of the site would also have to have some sort of boundary erected to make it safe. The end result may look like a fortified compound and is hardly going to help the residents integrate into the local area.
