

Dear Sir,

I have been made aware by the Aylesford Action Team that the W.D.C. are looking into creating a permanent Gypsy and Travellers site with pitches adjacent to Seven Trent Sewage works

I attended a public meeting at Aylesford school about potential areas for proposal. This site was not mentioned at all. To find this site a question being suddenly thrust upon the residents and also the potential residents living down Stratford Road, is reprehensible.

I have been honest and payed my dues to live here over a period of 50 or 60 years and now find you have to make provision for people, who, by choice live a life alien to the community and contribute very little

1. This is a residential part of Newark
2. We still have to put up with occasional smells from the Sewage farm
3. Aylesford school is almost on the site you are considering, the problems of access prior to residents and people who have to pass through the town to get to work
4. Access into the town is very poor as you are aware due to the river and the racecourse. Caravans passing through the

team is the last thing Warwick wishes for
5. Individual rites, which the proposal
contemplates, has far less relevance
than community rites which applies to
the vast majority and should be given
consideration.

If it is their choice to live the way
that they do, surely they should be left to do that.
