## Comments re: Modifications 16 and 14

Modification: Allocation of land north of Milverton for development

Modification no. 14

Paragraph no. Policy DS15

Mod.Policies map no. H44

Modification: Removal of land north of Milverton from the green belt

Modification no. 16

Paragraph no. 2.81

Mod. Policies map no. H44

I am deeply concerned by the above proposals, it is our duty to be responsible, custodial managers of the green belt, in other words to protect it for future generations. If the above developments were to proceed, the loss would be enormous. The environment would suffer irreversible damage, the character of Leamington and its size would alter dramatically, there would be a huge impact on wildlife and the extra traffic would create immense problems and diminish the quality of life of present residents.

Green belt legislation was put in place to prevent urban sprawl, by retaining it, we reduce our environmental impact and the necessity to put in place more infrastructure. Green belt land is an amenity which enriches our lives, it is not there for the convenience of large housebuilders seeking to maximise their profits. Once the integrity of green belts has been smashed it could be the beginning of a land rush where builders and individuals would be able to buy up tracts of land on the basis that they may become valuable at some time in the future, this has already happened with with large builders buying land on the edges of towns, 'land banking' as it is known. In spite of the Prime Minister insisting that the importance of green belt is 'paramount' the number of planning approvals for houses in the green belt continues to rise, in 2009/10 there were 2258, in 2013/14 there were 5607 and in 2015 there were 11907, the figures speak for themselves. If this trend continues we will witness the complete erosion of our countryside which has a specific role to play in terms of

wildlife habitats, carbon capture, food production and the prevention of flooding. We will also destroy our sense of wellbeing in seeing and knowing that the countryside is there.

Governments and all politicians have a duty to preserve our countryside but that takes a sense of moral purpose and integrity. It is their duty to regenerate every possible brownfield site within towns and I believe there are many, though builders prefer not to touch them as it erodes their profit margins.

Economic growth does not constitute an exceptional case for the development of green belt areas.

It seems to me that an exceptional case has not been made. Coventry Council must look closer to home for more sustainable sites, and I cannot see that building north of Leamington will satisfy their housing problems.

With global warming and environmental problems we cannot afford to lose valuable farming land and wildlife habitats.
