Old Milborton & Blackdown Planning Application

I understand today is the deadline for the right to object to this development which I have already previously objected to - understanding that green belt land could only be used after all brown field sites had been exhausted.

When I bought my house which is to be seriously effected by this proposal I naturally researched the possibilities of what might happen at the time I was made aware from WDC. Denoteping green belt was never going to happen.

I know the Government has moved the boundaries now as there is a shortfall of houses but the brown field site argument has to take precedent. The reasons given in reference to Caerdy having a shortfall and this is the only option simply does not stack up - the road system hardly copes with the traffic as it is - changing Kemulwark road into a dual carriageway simply isn't possible.

The Park and Drive designated area right opposite my house I have been told by Sceptic is just a remit for the planners to then apply for full planning as park and drive I understand becomes a brown field site.

Please can someone write and confirm to me
that this park and ride area is not going to
get planning to build a load more houses.

At the moment there is a substantial mis-trust
in our community which is verging on a bomb
just about to go off.

Trust, honesty and knowing what's going to
happen plays such an important in our lives I
think the planning dept should be aware of how
much stress this is all causing.

I apologise for bad handwriting and Spelling
but my printer is on the blink - I felt I
had to write something today.
