Dear Sir,

Reasons for not building 2000 houses on Greenbelt land in North Leamington when there are more suitable areas to use without digging up beautiful green fields which are Greenbelt which is supposed to be protected these places are South Leamington

The sewers will not be able to cope water will be strained Gas & Elec. will be under threat.

Cars everywhere will have at least 2 cars and all roads are all ready packed.

What do we need more stops for when the stops in Leamington are constantly closing because they can't make ends meet.

Jefford school will be able to cope with all the extra children.

There is also a bridle path which I have used for the past 50 years for my dog, and all the world says you are disturbing when this project can be sited elsewhere. Many people use this bridle path just to go for a pleasant walk in the country side.

Warehouses are standing empty
so why build more on Greenbelt land

If you go ahead with this scheme we
shall be almost in Kenilworth which we
do not want.

Hope you will take my points
into consideration and think again,
Yours sincerely
