Dear Sir,

Proposed Development, Old Milvatn
Kendwath & Blackdown

With regard to the above
proposal to build 2,930 houses
on the green belt land
surrounding north Leamington,
my husband, myself & our
family would like to lodge a
very firm objection.

We have lived in the north
Leamington area for approximately
39 years and the beauty &
uniqueness of Leamington's leafy
suburbs & residential areas,
bordering onto the green belt
land make it a truly inspired

and architecturally special Spatow. To virtually integrate it with Kenilworth, in itself a unique but very different sort of town would be a disaster so looked on by our children, grandchildren and generation to come.

To create an urban sprawl when already we have to our north a potential 'mega' metropolis consisting of Coventry, Bodsworth, Muncaster & Birmingham & other villages possibly, would be a tragedy.

I understand councils have to provide allocations of housing but wonder why brown field sites are not explored or a proportion of commercial & office designated sites for social housing, making them more affordable and realistic historically. It seems that there is an abundance of unlet commercial properties in the town & also potential redevelopment opportunities.

before considering an urban
sprawl on our green belt land.
It would most definitely destroy
our position, regarded
throughout the country, as
a truly special spot & town -
one of the only remaining,
green, residential & upmarket
(I say that Taguier on cheek but
it is an important issue) towns
in central warrwickshire &
the west midlands.

I would be grateful for
a reply at your convenience
& trust my comments will be
accepted with the respect they
were intended. I am very
aware of the huge responsibility
to the people of Leamington, &
particularly of North Leamington,
you bear.

Yours sincerely

ps

This on top of the proposed HS2 development which will cause maximum disruption in the area is hard to contemplate and completely unacceptable.
