Dear Development Policy Manager

The incursion into the Green Belt would be severely at odds with ~~the~~ current thinking which is very strongly aligned towards the concept that much current personal & societal discontent arises from disconnection from nature. Already this area has lost 2 green areas - the playing fields of N. Leamington College & those of Kingsley School. There are also the clear practical problems of lack of infrastructure. And finally the very legitimate concern that the planned scale of housing development contemplated is excessive.

The whole process & need require rethinking.

Yours sincerely
